ECO 1000

Rate of Rise Thermal Detector Model EC01005

Product Overview

Features

- Low profile design
- Low current draw
- 58PC operating temperature
- Operates on 12 and 24VDC Systems
- · Remote alarm test feature
- Easy Maintenance
- Range of detector bases available
- Remote LED Option
- Approved to EN54 –5:2000 Class A1R
- Extended warranty

Description

The ECO1005 thermal detector belongs to System Sensor's ECO1000 range of detectors. ECO1000 is a range of conventional detectors, which have been produced using the latest in manufacturing technology and supplied with an array of advanced features, making them 'better by design'.

The ECO1005 thermal detector uses a state of the art thermal element combined with an application specific integrated circuit (ASIC)to provide quick and accurate detection of fires. The detector incorporates both rate of rise and static elements and is suitable for all areas where the ambient conditions do not normally exhibit rapid changes in temperature.

A laser-based hand held Remote Test Unit can be used in conjunction with the range of EC01000 detectors for alarm test purposes. The unit transmits a coded message, preventing spurious alarms being generated by other laser-based devices. With a range of several metres, the hand held test unit provides an effortless way of remotely alarm testing the range of EC01000 detectors and removes the need for any direct physical access to the detector by the user.

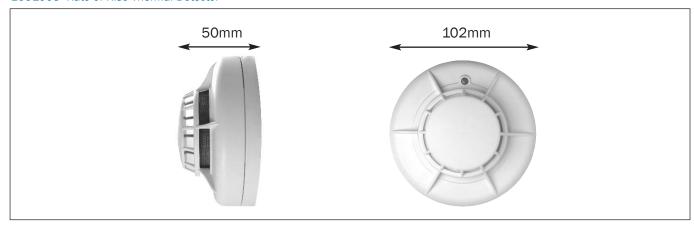

The ECO1005 detector also has an integral LED, which illuminates to provide a local alarm signal. This latches on,and remains illuminated until the detector is reset by a momentary power interruption. An optional remote LED annunciator may be used to repeat any alarm signal.

A variety of detector bases can be used with the ECO1005 detector, providing application flexibility and compatibility with a wide range of Fire Alarm Control Panels. All bases are fitted with a shorting spring to permit circuit testing prior to fitting the detector and have a tamper resistant feature, which when activated prevents removal of the detector without the use of a tool.

All System Sensor products are covered by our extended 3-year warranty.

Architect/Engineer Specifications

ECO1005 Rate of Rise Thermal Detector

Electrical Specifications

Operating Voltage Range
Typical Standby Current @25PC
Maximum Permissible Alarm Current

8 to 30VDC (Nominal 12/24VDC)
55µA @ 24VDC
80mA (current limited by control panel)

Environmental Specifications

Application Temperature Range (see note 1) 5% to 95% Relative Humidity -30PC to +70PC (non-condensing)

Mechanical Information

Height 40.5mm (plus 9.5mm for standard base) 102mm 70g (plus 45g for standard base)

Wire Gauge for Terminals Colour Material

0.4mm² to 2.0mm² Approximates to RAL9016 ABS

Product Range

Bases

EC01000BS Standard base with Shottky diode
EC01000DR Resistor base 470 Ohm
EC01000DB Deep base
EC01000DBR Deep base EC01000DBRD Deep base with Shottky diode
EC0100DBRD Deep resistor base 470 Ohm
EC0100DBRD Deep resistor base 470 Ohm
EC01000BREL12L Relay base 12V Latching
EC01000BREL24NL Relay base 24V Latching

Accessories

ECO1000RTU Remote Test Unit

Other Detectors

EC01002 Photoelectric/Thermal Detector EC01003 Photoelectric Detector EC01004T 78PC Fixed Temperature Thermal Detector EC01005T 58PC Fixed Temperature Thermal Detector

Notes

- To avoid unwanted alarm conditions being triggered by class A1R and A1S detectors the maximum ambient operating temperature should not exceed 45PC.
- 2. Bases with other resistor values are available to suit the requirements of most Fire Alarm Control Panels.
