technical characteristics

caratteristiche tecniche

FULL BODY. This term enhances the homogeneous quality of the product, aspect that makes possible a very low wear and a very high durability either for normal spaces or for heavy-traffic zones.

MICROSEALED. Microsealed, made in surfaces of all pieces, makes possible the very low absorption in porcelain stoneware, avoiding dirtiness. For that reason this product is clean and hygienic.

MONOCALIBER. Every piece with the same format has the same size, very important characteristic for use in high-level projects. These products are manufactured without bevel and can be located without joint.

RESISTANT TO FROST. The Tech Porcelain productive process includes the most advanced technology presented in the market. In this way, water absorption is practically zero and, for this reason, customers can trust in the product for use in exteriors.

GREAT MECHANICAL RESISTANCE. Thanks to their homogeneous surface and their special productive qualities, these pieces are characterized by their great resistance, clearly superior to norms.

TUTTO MASSA. Questa grade qualità indica che il prodotto è omogeneo in tutto il suo spessore, motivo per cui la usura è molto meno accentuata e la sua resistenza si moltiplica tanto nell'uso normale quanto in quello in zone ad alto calpestio.

MICROBISSELLATURA. La microbisellatura a cui viene sottoposta la superficie della piastrella contribuisce alla bassa assorbenza del prodotto impedendo che lo sporco possa penetrare. Per questo è un materiale pulito e igienico.

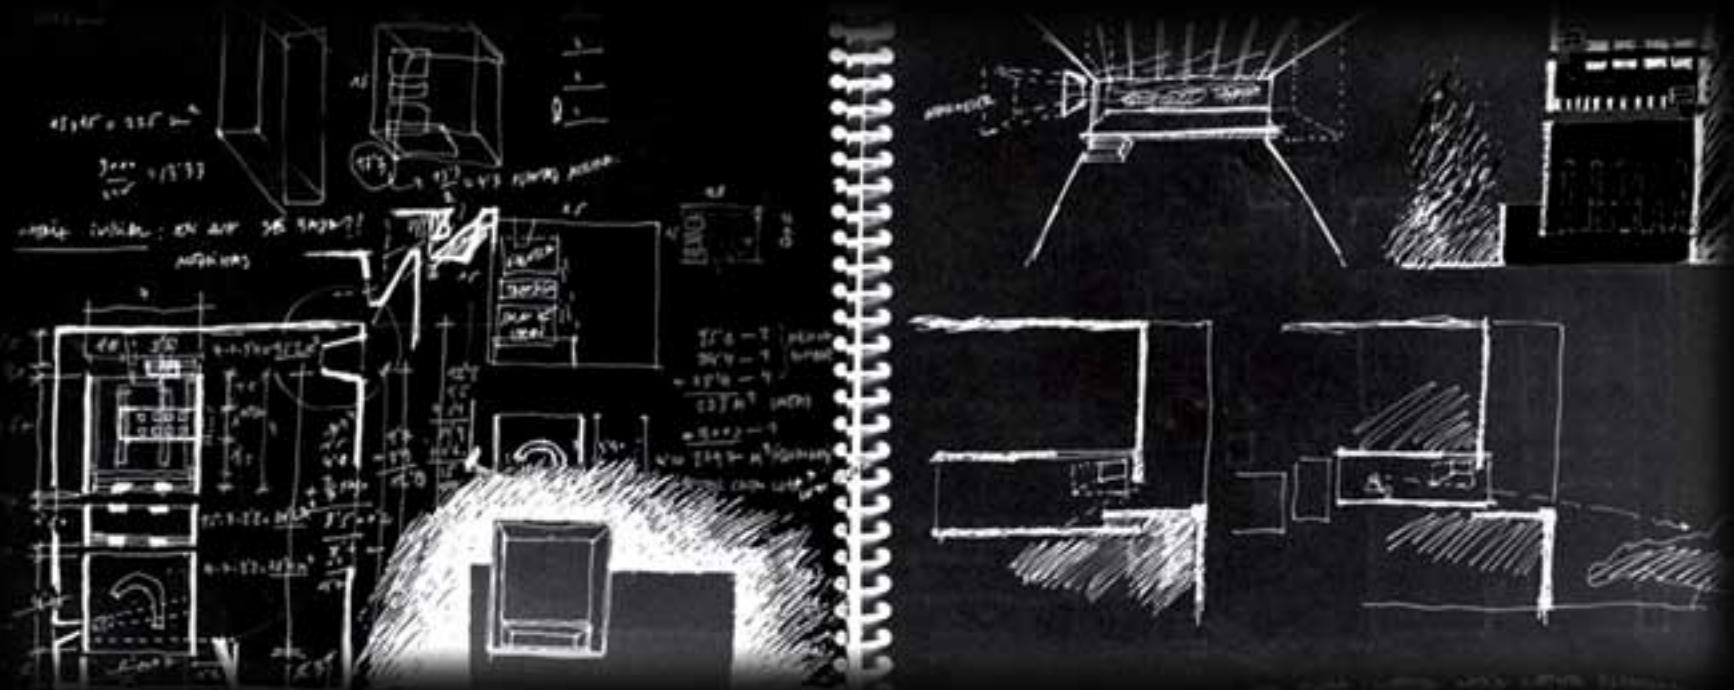

MONOCALIBRO. Tutti i pezzi dello stesso formato hanno esattamente le stesse misure, una caratteristica molto importante nell'elaborazione dei progetti. Inoltre, questi pezzi non sono bisellati e possono essere posati a giunto unito.

INGELIVO. Il processo produttivo del Porcellanato Tech è realizzato con le ultime tecnologie sul mercato che permettono un'assorbenza d'acqua pari quasi a zero e che quindi consentono la sua collocazione con ogni garanzia anche in esterno.

GRANDE RESISTENZA MECCANICA. Grazie alla omogeneità della superficie e alle sue speciali caratteristiche produttive questo prodotto è caratterizzato dalla sua grande resistenza, molto superiore alle norme stabilite.
