PORCELANICO

300 000 sqm industrial area

FULL BODY. This term enhances the homogeneous quality of the product, aspect that makes possible a very low wear and a very high durability either for normal spaces or for heavy-traffic zones.

MICROSEALED. Microsealed, made in surfaces of all pieces, makes possible the very low absorption in porcelain stoneware, avoiding dirtiness. For that reason this product is clean and hygienic.

MONOCALIBER. Every piece with the same format has the same size, very important characteristic for use in high-level projects. These products are manufactured without bevel and can be located without joint.

RESISTANT TO FROST. The tech porcelain productive process includes the most advanced technology presented in the market. In this way, water absorption is practically zero and, for this reason, customers can trust in the product for use in exteriors.

GREAT MECHANICAL RESISTANCE. Thanks to their homogeneous surface and their special productive qualities, these pieces are characterized by their great resistance, clearly superior to norms.
