SANYO

Trust is good, control is better...
...the perfect colour monitors for small surveillance systems

Security can be this attractive!

The colour monitors from Sanyo are the perfect partners for small surveillance systems. Externally they are as attractive as a modern television, technically they provide a perfect security service.

Four different sizes are available: VMC-7314E (14''), VMC-7321E (21''), VMC-7225E (25'') and VMC-7228E (28''). With the help of a multiplexer, the appropriate number of cameras can be connected to

each monitor – in this way, a faultless overview is guaranteed. Each monitor has one video and one audio in/out terminal.

Whether you are watching live pictures or you have recorded with the "last status memory" function, the replay quality of the pictures is excellent. Thanks to the the 400 TV Lines and an additional focus control, even the smallest details are clear and the colours lifelike.

Possible applications include: small to medium retail outlets and subsidiaries, casinos, car parks, underground car parks and many more.
