

Sophisticated and Professional

SX-Series Surveillance LCD Display

Daisy Chain

Auto Termination

Quick Signal-Switching

Multiple Inputs

NeoV Optical Glass

Designed specifically for environmental surveillance and security applications, the SX-Series delivers a high 1280x1024* resolution, automatic termination and quick signal switching time. Additionally, multiple displays and video equipments can be daisy chained through the BNC connection for a more integrated solution. SX-Series is ideal for monitoring public and private domains such as airports, buildings, shopping malls and other security sensitive areas.

- Available in 19", 17" and 15" sizes
- High 1280 x 1024* SXGA resolution
- Auto termination
- Quick signal-switching time
- Selectable signal source : BNC, DVI and D-Sub
- Supports color and B/W pictures
- PC compatible
- NeoV Optical Glass™ protects panel while enhancing picture quality
- Distinctive aluminum alloy housing for added strength
- VESA standard wall or arm mount

*1280X1024 resolution is only available on SX-19 & SX-17 models

Model		SX-19	SX-17	SX-15
Panel	Panel Type	TFT LCD	TFT LCD	TFT LCD
	Panel Size	19" (483mm)	17" (432mm)	15" (381mm)
	Max. Resolution	SXGA 1280 x 1024	SXGA 1280 x 1024	XGA 1024 x 768
	Pixel Pitch	0.294mm	0.264mm	0.297mm
	Brightness	300cd/m ² (Typical)	300cd/m ² (Typical)	400cd/m ² (Typical)

NeoV Optical Glass™

NeoV is a cutting edge "Optical Glass" technology that is designed into the front bezel of the AG Neovo display, to enhance the display quality and viewing comfort for the user. The patent-pending NeoV Technology is exclusively developed and owned by AG Neovo

Designed for Performance

The proprietary multi-coated optic glass delivers vibrant rich colors and crystal clear image definition for ultimate clarity and reduced eye fatigue.

Built to Last

Protect your investment. A conventional LCD panel is soft and can be easily damaged. The hardened glass exterior of the NeoV Optical Glass™ is highly durable and scratch resistant. It protects the delicate internal LCD panel from physical damage common with conventional displays.

How does NeoV Improve an AG Neovo Display?

Panel Protection

Surface Hardness

MOH's Hardness Rating

Panel Protection

The NeoV Optical Glass™ adheres to a stringent manufacturing process that hardens the glass for added strength and quality. As with a typical LCD display, the panel hardness only reaches 2H (out of 10H) on the MOH's Hardness Scale, so the panel can be easily scratched or damaged. With the NeoV, the glass attains a measurement of 6 on the hardness scale. This hardness will protect the panel from dirt, repetitive touching or other devices that can damage the LCD panel's fragile membrane.

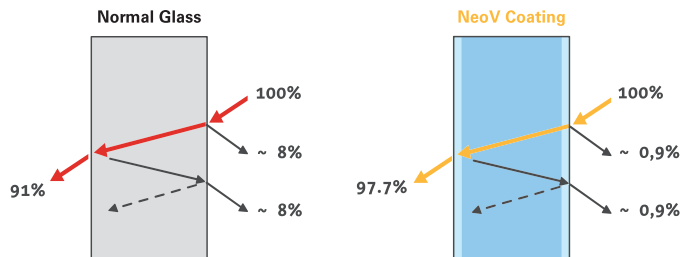

Anti-Reflection

Anti-Reflection

The NeoV Optical Glass™ possesses multi-layer coating, it is capable to decrease the reflection from 4.1% to 0.93%, which results in a 77.3% visual improvement.

High Transmittance

High Transmittance

With a high 97.7% transmittance rate, the NeoV provides a nearly perfect brightness for the panel. In a typical glass, the transmittance is 91%. Both the transmittance and reflectance can be custom-made to fulfill the various environmental and customer needs.

Improved Viewing Comfort

Through NeoV Optical Glass™, the color appears more softened and graceful, while making it more comfortable for extended reading periods.

Easy to Clean

NeoV Optical Glass has passed the CNS (13033) A-level acid test and B-level alkali test. The glass can be easily cleaned with water, alcohol or common cleaning solution.

Multiple Connections:

Based on different working environments or surveillance needs, a combination of different security products can be looped together for a more integrated solution.

Accessories

■ Height Adjustable Stand (ES-01)

- Compatible with VESA standard (75 x 75mm and 100 x 100mm)
- Height adjustment for 80mm
- Pivot for landscape or portrait display
- Swivel left and right for 90°
- Tilt up and down for 30°
- Weight capacity: 5.1~6.7Kg

■ LCD Display Arm (AG-01)

- Wide range of angle adjustments to suit all situations
- Conforms with VESA's FPMPMI mounting standard
- Gas-spring system guarantees smooth and stable operation
- Handles LCD displays up to 8.0 kg (18 lbs)

■ Pivot Mounting Kit (PMK-01)

- Firmly fix on solid wall
- Swivel left and right for 180°
- Pivot upwards and downwards for 180°
- Display pivot for 270°
- Compatible with VESA standard (75 x 75mm and 100 x 100mm)
- Weight capacity: 7~14 kg

■ Pivot Mounting Kit (PMK-02)

- Effortless and free stop adjustment
- Compatible with VESA standard (75 x 75mm and 100 x 100mm)
- Display pivot for 360°
- Swivel left and right for 90°
- Tilt upwards and downwards for 35°C
- Weight capacity: 3.5~8.5Kg

■ Wall Mount Kit (WMK-01)

- Easy to mount 2-piece bracket design
- Compliant with VESA FPMPMI standards
- Anodized surface prevents rust even after prolonged use
- Accommodates LCD displays up to 18 kg (40 lbs)
