

FAVA2 Analog Series - Product Specifications

Two Channels Video, Point to Point Transmission

PRODUCT DESCRIPTION

The KBC FAVA2 Analog series utilizes AM modulation and Automatic Gain Control to provide transmission of two channels independent video signal in one module on 2 independent multimode optical fibers. PAL, NTSC and SECAM standards are fully supported. This series is widely used in security surveillance, highway monitoring, automation, intelligent residential houses, customs, electrical companies, gas and petroleum industry, chemical facilities, and many other areas. The plug-and-play design ensures ease of installation; no electrical or optical adjustment is needed. LED indicators are provided for showing operating status of the unit and the interfaces. This series is available as stand-alone wall mount unit or a 3U chassis card.

MODEL LEGEND

¹ Please select the power plug from US Standard, Euro 2 Circular or UK 13A when placing order.

² Support maximum up to 14 cards for each 3U Chassis .

³ Transmission distance is limited by optical loss of the fiber and loss introduced by connectors, splices and patch panels. Fiber bandwidth also limits the transmission distance.

Due to ongoing technological improvements, product specifications are subject to change without notice.
