#### **PUNZON ESTANDAR**

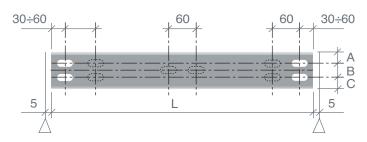

#### Mecanizado de Cotas Variables

#### **UNA LINEA DE PUNZONES**

Este mecanizado permite la posibilidad de variar la distancia del centro del primer punzón al extremo entre 30 y 60 mm., siempre que el resto de las distancias sean 60 mm.

#### **DOS LINEAS DE PUNZONES**

Las cotas "A", "B" y "C" son variables bajo consulta.

### **Mecanizados Especiales**

La más alta tecnología aplicada al proceso de mecanización permite punzonar la correa en cualquier punto, con cualquier secuencia o disponer el punzón vertical y horizontalmente. También permite la posibilidad de desarrollar punzones personalizados.

#### **PUNZONES ESPECIALES**

Coliso 24x18 mm.
Coliso 14x18 mm.
Redondo 18 mm.
Redondo 14 mm.
Redondo 12 mm.
Otras opciones bajo consulta.

## **Conectores y Complementos**

Posibilidad de suministro del sistema completo: Conectores (empalmes de continuidad) según las necesidades del cliente, rigidizadores (tirantillas) a la medida, tornillería, etc...

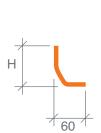

## **Ejiones**

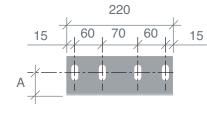

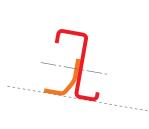

Pieza laminada en caliente de 4 mm. de espesor para correas "C" y "Z" desde 80 hasta 350 mm. de altura.
