

PEDRACEM®

CLADDING FOR FACADES BY PAVIMENTOS NAVARRA

QUALITY AND PRICE OF ARTIFICIAL STONE WITH THE APPEARANCE OF NATURAL STONE

This is a product line, manufactured in our company, that mainly covers the cladding of facades but can also be used as a solution for the facing of footings, pillars, window bays, doors...and other structural elements.

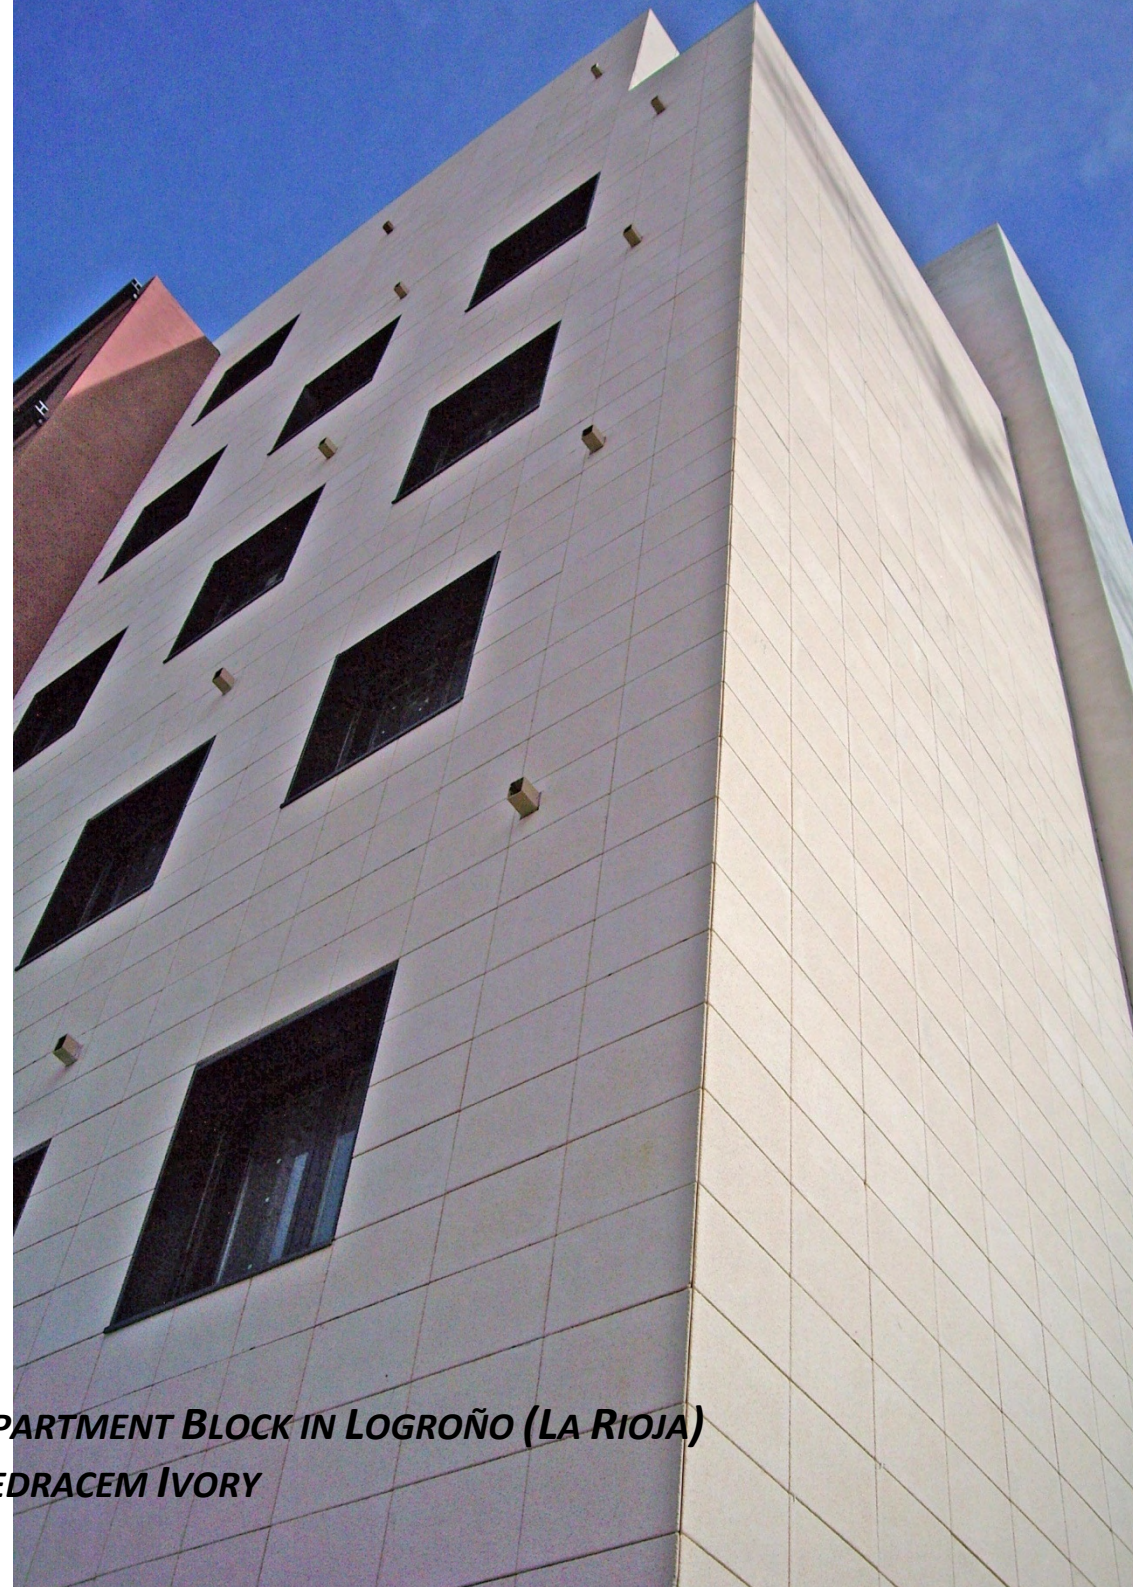

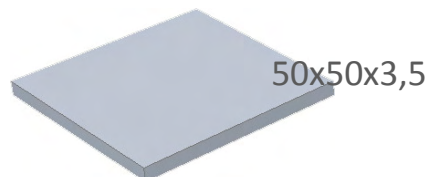

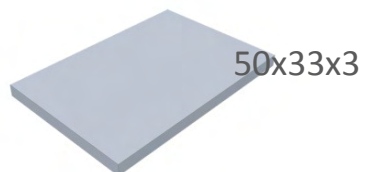

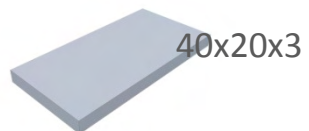

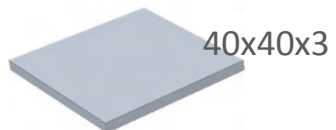

It combines the advantages of natural stone -for appearance and elegance- but at a more competitive cost.

Its texture is sand-blasted and it looks like natural stone.

It combines natural elements such as crushed stone and sand together with other compounds.

It is manufactured in the following formats:

- 40x40x3 cm
- 40x20x3 cm
- 50x33x3 cm
- 50x50x3.5 cm

APARTMENT BLOCK IN LOGROÑO (LA RIOJA)
PEDRACEM IVORY

Its main advantages are:

- Standard format, with exact measurements
- Totally waterproof on the visible surface
- Frost-resistant.
- Maximum grip during construction.
- Anti-slip, ideal for exterior applications, swimming pools, terraces, gardens.
- Wide range of colours.
- Standard colours and tonalities.
- Absence of veins and concavities.
- Resistant to rust and atmospheric corrosion.

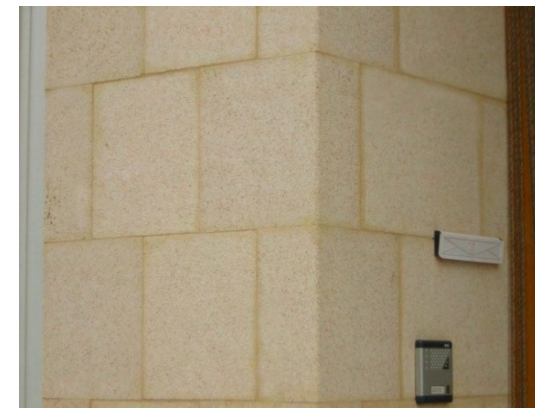

Guarantees:

- The material complies with current legislation and comes with proficiency testing certificates issued by leading certification agencies, both in Spain (UNE-EN 13748) and the USA.
- Present in a large number of building projects over the last 5 years without incidents.
- Patented in the EEUU under the name VISTASTONE (also property of Pavimentos Navarra S.L.L.)

Technical solutions:

- Cladding of structural elements, chimneys, footings...
- Corners
- Weathering
- Jamb posts and waling
- Column facing
- Multi-purpose crowning
